

FACTSHEET - D13 ENGINE

Volvo Engine

The Volvo D13 is a very fuel-efficient, powerful and lightweight engine, designed to meet current and future EPA regulations while improving reliability and lowering operating costs.

Several power ratings are available in the range from 400 to 500 hp. The engine provides impressive performance with excellent low-end torque for improved drivability. The new variable geometry turbo also makes the engine very responsive while improving fuel economy.

Four Eco-Torque and two Dual-Torque ratings provide "dual-personality" torque output for those customers who desire the high fuel economy of their lower torque levels with the strong performance of their higher outputs.

An oil drain interval of up to 35,000 miles helps in reducing operating costs. The Volvo D13 engine delivers a reliable, cost-effective and powerful solution -- in a light, high-performance package -- for a wide variety of applications.

SPECIFICATIONS

	HP	Torque
Euro 3	400	2.000 Nm
Euro 3	440	2.200 Nm
Euro 5	420	2.100 Nm
Euro 5	460	2.300 Nm
Euro 5	500	2.500 Nm
